

HIRING FOR CIVIL ENGINEER

Role Summary

Vismarin Management is an engineering project management firm focused on agro-industrial developments such as palm oil and coconut processing facilities, with active projects across Southeast Asia, primarily in Indonesia. We are seeking a Civil Engineer with a minimum of a Masters degree and at least 2 years of relevant work experience to join our growing team.

Job Title: Civil Engineer

Reporting to: Project Manager and Company Director

Location: Anggun City, Rawang, Selangor (with frequent overseas travels)

Remuneration: Salary from RM 5,000/month (with allowance for overseas secondment)

Responsibilities:

- Support planning and coordination of civil and structural works across active project sites.
- Review design drawings and construction details to ensure accuracy and compliance.
- Prepare and maintain project progress reports, site records, and documentation.
- Monitor site progress and proactively address technical or construction issues.
- Liaise with contractors, consultants, and internal teams to ensure smooth workflow.
- Conduct inspections and quality control checks to uphold safety and construction standards.
- Assist in cost control and ensure works are delivered on schedule and within budget.
- Comply with internal procedures and engineering standards.
- Contribute to a positive, solution-focused working environment.
- Support the broader objectives of the project management team as required.

Qualities and Skills Required

- Masters degree in Civil Engineering or higher.
- Applicants with at least 2 years of relevant experience are encouraged to apply.
- Willingness to travel frequently, particularly to project locations in SEA and the Pacific Islands.
- Good understanding of civil construction methods and materials.
- Ability to interpret technical drawings and specifications.
- Proficient in AutoCAD, Revit, and Microsoft Excel.
- Strong organisational and communication skills.
- Proactive, self-motivated, and able to work independently and as part of a team.
- Able to manage site activities and work with multiple stakeholders effectively.
- Commitment to safety and quality standards.

Desirable

- Practical experience in agro-industrial or plantation-related projects is an advantage.
- Familiarity with basic project management tools and reporting software.

This description reflects the core activities of the role but is not intended to be all-inclusive. Other duties may be required in line with operational needs. The post holder is expected to adopt a flexible approach to work, and job descriptions will be reviewed periodically to reflect organisational requirements.
