

HIRING FOR ELECTRICAL ENGINEER

Role Summary

Vismarin Management is an engineering project management firm focused on agro-industrial developments such as palm oil and coconut processing facilities, with active projects across Southeast Asia, primarily in Indonesia. We are seeking an Electrical Engineer with a minimum of a Masters degree and at least 2 years of relevant work experience to join our growing team.

Job Title: Electrical Engineer

Reporting to: Project Manager and Company Director

Location: Anggun City, Rawang, Selangor (with frequent overseas travels)

Remuneration: Salary from RM 5,000/month (with allowance for overseas secondment)

Responsibilities:

- Plan and coordinate electrical works at project sites, including power distribution and control systems.
- Oversee installation of electrical panels, wiring, cabling, and terminations.
- Supervise installation and commissioning of motor control centres (MCC) and factory power systems.
- Liaise with electrical contractors, vendors, and internal teams to ensure smooth project execution.
- Troubleshoot and resolve electrical issues during construction and commissioning phases.
- Conduct inspections and electrical testing to ensure compliance with safety standards and specifications.
- Prepare and maintain progress reports, technical documentation, and site records.
- Monitor project timelines and ensure electrical works are delivered on schedule.
- Ensure compliance with internal procedures, industry standards, and electrical regulations.
- Support the project management team with practical electrical solutions as required.

Qualities and Skills Required

- Masters degree in Electrical Engineering or higher.
- Minimum 2 years of relevant work experience in industrial or factory-based projects.
- Willingness to travel frequently, particularly to project locations in SEA and the Pacific Islands.
- Strong understanding of electrical systems, wiring standards, and power distribution.
- Ability to read and interpret electrical drawings, schematics, and specifications.
- Proficient in AutoCAD, Revit (MEP), and Microsoft Excel.
- Strong organisational and communication skills.
- Proactive, self-motivated, and able to work independently and as part of a team.
- Able to manage site activities and coordinate with multiple stakeholders effectively.
- Commitment to safety and quality standards.

Desirable

- Practical experience in agro-industrial or plantation-related projects is an advantage.
- Familiarity with electrical testing equipment and project management tools.

This description reflects the core activities of the role but is not intended to be all-inclusive. Other duties may be required in line with operational needs. The post holder is expected to adopt a flexible approach to work, and job descriptions will be reviewed periodically to reflect organisational requirements.
