

HIRING FOR MECHANICAL ENGINEER

Role Summary

Vismarin Management is an engineering project management firm focused on agro-industrial developments such as palm oil and coconut processing facilities, with active projects across Southeast Asia, primarily in Indonesia. We are seeking a Mechanical Engineer with a minimum of an Masters degree and at least 2 years of relevant work experience to join our growing team.

Job Title: Mechanical Engineer

Reporting to: Project Manager and Company Director

Location: Anggun City, Rawang, Selangor (with frequent overseas travels)

Remuneration: Salary from RM 5,000/month (with allowance for overseas secondment)

Responsibilities:

- Plan and coordinate mechanical works across project sites, including machinery installation and commissioning.
- Oversee installation of process equipment such as pumps, conveyors, pressure vessels, and utility systems.
- Liaise with machinery suppliers and contractors to ensure correct installation and operation.
- Troubleshoot mechanical systems and equipment during construction and commissioning phases.
- Conduct inspections and testing to verify mechanical performance and safety compliance.
- Prepare and maintain detailed progress reports and technical documentation.
- Monitor construction schedules and coordinate mechanical works to meet deadlines.
- Assist in maintenance planning and advise on spare parts inventory.
- Ensure compliance with engineering standards and safety regulations.
- Support the project team with practical solutions and technical input as required.

Qualities and Skills Required

- Masters degree in Mechanical Engineering or higher.
- Minimum 2 years of relevant work experience in industrial or factory-based projects.
- Willingness to travel frequently, particularly to project locations in SEA and the Pacific Islands.
- Strong understanding of mechanical systems and industrial equipment installations.
- Ability to read and interpret mechanical drawings, P&ID, and specifications.
- Proficient in AutoCAD, Revit (MEP), and Microsoft Excel.
- Strong organisational and communication skills.
- Proactive, self-motivated, and able to work independently and as part of a team.
- Able to manage site works and coordinate with multiple parties effectively.
- Commitment to safety and quality standards.

Desirable

- Experience in agro-industrial or processing plant projects is an advantage
- Familiarity with project management tools and reporting software.

This description reflects the core activities of the role but is not intended to be all-inclusive. Other duties may be required in line with operational needs. The post holder is expected to adopt a flexible approach to work, and job descriptions will be reviewed periodically to reflect organisational requirements.
